

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. With offices spanning all six continents, we strive to create a sustainable society and economy that positively impacts our climate, ecosystems and communities. With our solutions we inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Senior Full Stack Web Developer (80-100%) based in Amsterdam, London or Stockholm

As a key member of the Development team you will work on the establishment of a new application for trading carbon emissions certificates, as well as on its integration within our existing technology landscape. The development team uses Agile methodologies where all roles collaborate with one another to complete each unit of work. If you are a motivated web developer professional with excellent communication and interpersonal skills and you are able to thrive in a fast paced environment, then we are looking for you!

Tasks and responsibilities

- Design, implement, and unit test both front-end and back-end application code
- Participate in the full Systems Development Life Cycle (SDLC, Agile), including meetings, iterative development, estimations and design sessions
- Work with business analysts to understand and implement complex business functionality
- Deliver project assignments on time, within budget and with high quality
- Stay current with the newest online technologies; research new technologies and make recommendations on implementations
- Collaborate with other developers in designing and implementing integrated, enterprise solutions

Your profile

- Bachelor's degree in Computer Science or related field, or equivalent practical experience
- 3+ years of web development experience
- Familiar with popular frameworks and technologies such as Angular 2+ or React, Node JS or Go frameworks, HTML 5, ES6 and CSS
- Ability to design and implement modular applications using elegant code
- Solve any issues in the front-end and single handedly able to provide creative and innovative solutions
- Strong problem solving and critical thinking skills
- Able to work independently; have a can-do attitude
- Solid communication skills; demonstrated ability to explain complex technical issues to both technical and non-technical audiences

We offer

- Work in a global company with a real commitment to sustainability and fighting climate change
- Work with highly dedicated and motivated experts of SP's dynamic team
- Great team spirit

Please apply

If you are interested in joining a young and international team looking to make a difference to the world we would be happy to hear from you!
