

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. South Pole acts today 'for a better tomorrow'. With offices spanning all six continents, we accelerate the transition to a climate-smart society. Our vision is "Climate Action for All": We inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Data Analytics Intern - Sustainable Finance (100%) based in Mexico City, Mexico

As a Sustainability Data Analytics Intern, you will be joining our Consultancy and Services team. You will support our sustainability experts by conducting research tasks related to advisory and data services for the financial sector. You will seek, organise and generate data which will support our team with the preparation of deliverables for mandates and business development products. This position will give you a unique opportunity to apply and enhance your skills acquired at university. If you are an enthusiastic and dynamic person with an academic background in sustainability and you are passionate about helping to fight climate change as part of your daily work, then we are looking for you.

Tasks and responsibilities

- Execution of research tasks in areas related to climate risk and impact data
- Data collection and curation
- Support in preparing analytical inputs to project deliverables related to South Pole's sustainability offering to the financial industry

Your profile

- A university degree in Economics, Finance, Data Science, Applied Math, Environmental Science or related disciplines. A Master's degree would be of advantage
- Candidates with at least 80% of their studies completed are also encouraged to apply
- Excellent research, analytical and methodological skills
- Numerically literate and fully comfortable in working with large datasets and conducting research tasks
- Attention to detail and commitment to providing high-quality data-based outputs
- Independent and pro-active worker who is diligent and reliable
- Experience in data curation and/or analysing and working with financial and non-financial data is an advantage
- Excellent knowledge and command of Excel
- Basic knowledge of data querying and scripting languages (e.g. SQL, Python), and relevant softwares (e.g. R) is an advantage
- Excellent oral and written command of Spanish and English
- Previous work experience is an advantage but not mandatory
- Personal interest in sustainability and climate-related topics

We offer

- Be part of a growing and multicultural company with 250 staff in 18 offices worldwide
- Collaborating in a challenging and exciting global company with a real purpose
- Acquiring an understanding of the current state of play in sustainability issues and grow your skills in this topic
- Working with highly dedicated and motivated experts of South Pole's dynamic team

Please apply

If you are interested in joining a young and international team looking to make a difference to the world we would be happy to hear from you! Please send your cover letter and CV directly through our [website](#). If you have any questions regarding this vacancy, please contact us jobs@southpole.com.
