

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. South Pole acts today 'for a better tomorrow'. With offices all around the globe, we accelerate the transition to a climate-smart society. Our vision is "Climate Action for All": We inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

UX/UI Designer (80-100%) based in Berlin, Amsterdam or London

At South Pole we are committed to make Climate Action accessible for all, from large organisations to individuals. As a UX/UI designer you will help us shape our next generation of products and bring an outstanding user experience. In addition, you will take on complex tasks and transform them into intuitive, accessible and easy-to-use designs for people from various walks of life - from the first-time user to the sophisticated expert. You will collaborate with a team of remote engineers and you will support them throughout the product development process: from creating user flows and wireframes, to building user interface mockups and prototypes. At each stage, you will anticipate what our users need, advocate for them and ensure that the final product delights them.

Tasks and responsibilities

- Design elegant flows and interactions, translating concepts into intuitive user experiences
- Manage the end-to-end design lifecycle: from user stories, to mockups and visual design
- Collaborate with the Engineering team and act as a customer advocate along the implementation process
- Help create a design system that is in line with our brand and our mission

Your profile

- Masters degree in Design, HCI or similar
- 3-5 years of proven experience in a similar role
- Excellent communication skills in English and German
- Outstanding UX portfolio, demonstrating clear insights, problem solving skills and simple solutions
- Track record of products and platforms that have been shipped
- Technical knowledge of front-end mobile and web technologies
- Excellent communication skills: ability to listen, articulate positions and advocate designs
- Proficient in working with product design tools (Sketch, InVision etc.)
- National or holder of a valid required work visa

We offer

- Excellent team spirit within the world's leading independent sustainability company
- Be part of a growing and multicultural company
- Work autonomously as well as within a large and international team of passionate sustainability professionals
- Clear career development potential

Please apply

If you are interested in joining a young and international team looking to make a difference to the world we would be happy to hear from you! Please send your cover letter and CV directly through our [website](#). If you have any questions regarding this vacancy, please contact us on jobs@southpole.com.
