

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. South Pole acts today 'for a better tomorrow'. With offices all around the globe, we accelerate the transition to a climate-smart society. Our vision is "Climate Action for All": We inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Product Manager - Web Applications (80%-100%) based in Berlin, London or Amsterdam

We believe that climate action is more than the title of a presentation slide. That is why we work both on the field - developing emission reduction projects, as well as in the office - developing tools that empower organisations, governments and individuals alike to fight climate change.

Your mission: turn our product into the leading platform for carbon accounting and offsetting on the market.

As a product manager - web applications, you will be part of a multidisciplinary team, with a role in bringing together their inputs into a coherent product roadmap. You will act as a client ambassador, advocating for new features and their benefits, and you will lead projects from business idea to rollout. Working closely with a small team of programmers, you will ensure that the team delivers against key objectives. In addition, you will be the go-to person for some of our existing clients, and you will support them along their climate action journey.

Tasks and responsibilities

- Work collaboratively with the Sales, Marketing, UX, and Engineering teams and support the product vision and strategy
- Produce technical specifications and support the development team during the entire product lifecycle
- Contribute to proposals, and help shape our offering to prospective clients

Your profile

- Bachelor's degree in Computer Science or equivalent experience in building and shaping technical products
- 3-5 years of experience in a similar role
- Experience in implementing product vision, go-to-market strategy, and design discussions
- Experience creating product roadmap(s) and working with cross-functional teams.
- Ability to quickly understand complex business processes and data analysis needs
- Familiarity with software development methodology and release processes
- Ability to document requirements and specifications in clear language
- Excellent oral and written command of English
- Knowledge of common web technology stacks is a plus
- National or holder of a valid work permit

We offer

- Excellent team spirit within the world's leading independent sustainability company
- Be part of a growing and multicultural company
- Work autonomously as well as within a large and international team

Please apply

If you are interested in joining a young and international team looking to make a difference to the world we would be happy to hear from you! Please send your cover letter and CV directly through our [website](#). If you have any questions regarding this vacancy, please contact us on jobs@southpole.com.
