

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. South Pole acts today 'for a better tomorrow'. With offices all around the globe, we accelerate the transition to a climate-smart society. Our vision is "Climate Action for All": We inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Product Owner - Web Applications (80-100%) based in Berlin, London or Amsterdam

We believe that climate action is more than the title of a presentation slide. That is why we work both on the field - developing emission reduction projects, as well as in the office - developing tools that empower organisations, governments and individuals alike to fight climate change.

Your mission: improve our suite of internal tools to better meet the requirements of a growing organization

You will be responsible for end-to-end delivery from business idea to roll-out. Working collaboratively with multiple internal stakeholders (Sales, Finance, HR etc), you will gather requirements, and translate these requirements into technical specifications. In addition, you will manage a small team of programmers, you will ensure that the team delivers against key objectives.

Further, you will act as the go-to-person for internal stakeholders seeking support on existing processes. You will have to guide them through the change management process, and ensure that all business functions follow established best practices.

Tasks and responsibilities

- Work collaboratively with other business functions to identify gaps and potential process improvements
- Align process changes with tool updates, and coordinate all development efforts into a coherent product roadmap
- Produce technical specifications and support the development team during the entire product lifecycle
- Monitor data quality and support other functions with business intelligence reports

Your profile

- Bachelor's degree in a technical field or equivalent experience building/shipping technical products.
- 3-5 years of relevant work experience
- Ability to quickly understand business processes and data analysis needs
- Familiarity with software development methodology and release processes
- Ability to document requirements and specifications in clear language
- Advanced oral and written command of English
- Knowledge of Relational Databases; knowledge of SQL, HTML, CSS, JavaScript, PHP is a plus

- National or holder of a valid work permit

We offer

- Excellent team spirit within the world's leading independent sustainability company
- Be part of a growing and multicultural company
- Work autonomously as well as within a large and international team of passionate sustainability professionals

Please apply
