

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. South Pole acts today 'for a better tomorrow'. With offices all around the globe, we accelerate the transition to a climate-smart society. Our vision is "Climate Action for All": We inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Junior Project Manager (100%) based in Jakarta, Indonesia

South Pole mitigates the impact of climate change by developing high quality emission reduction projects and consultancy mandates all over the world. These projects are developed under reputed carbon standards such as the CDM, VERRA (aka VCS) and the GS4GG (aka Gold Standard) and are typically developed in renewable energy, waste (and wastewater) management, energy efficiency, agro-forestry and land use leading to issuance of carbon credits. As a Junior Project Manager, you will be contributing to the carbon markets of tomorrow by implementing and managing the emission reduction projects with access to direct client relationship within Southeast Asia.

Tasks and responsibilities

- Taking an active role in the implementation and management of the emission reduction projects in Thailand which includes drafting project design documents, validation, monitoring and verification support under different standards (CDM, VERRA, GS4GG) among other local and international carbon schemes
- Maintain good relationships with project owners, clients, DOEs (auditors) and other counterparts
- Ensure that project documents are drafted in a high quality manner
- Conduct site visits and travel to project locations whenever needed
- Assist with Market research on emerging new topics in the sustainability sector and provide support with project sourcing

Your profile

- University degree in Renewable Energy, Environmental Science, Engineering, Sustainability, or any climate change and carbon mitigation related fields or any related field
- Good understanding of carbon standards (CDM, VERRA, GS4GG or others)
- Familiarity with mitigation activity, climate change topic, carbon projects, and renewable energy development will be an advantage
- Recent graduates are encouraged to apply. If you have initial experience (up to 3 years) in project development, this is considered as a plus
- Excellent interpersonal and communication skills
- Ability to take decisions and prioritise tasks
- Willingness to travel and ability to meet deadlines

We offer

- Work in a growing global profit for purpose company with a real commitment to sustainability and fighting climate change
- Excellent team spirit, work within a large and international team of sustainability passionate professionals
- The opportunity to work with professional experts all around the world

Please apply

If you are interested in joining a young and international team looking to make a difference to the world we would be happy to hear from you!
